Education

Operation Spark   New Orleans, LA
IBC Fundamentals of JavaScript, Functional Programming, and Web Development Level 3   October 2021

Work Experience

Premium Parking   New Orleans, LA
Valet and Facility Supervisor   July 2014 - August 2020

- Served in a leadership role as lead valet then facility supervisor at the Windsor Court Hotel, one of the finest hotels in the world
- Audited keys and corresponding vehicles multiple times daily in our main garage and overflow lots
- Filed shift reports for revenue and performed cash drops for transient parking vehicles
- Performed audits of the revenue from overnight vehicles and adjusted the parking rates and/or local and state taxes rates when necessary
- Inventoried work materials for our locations and implemented resource management systems.
- Assigned tasks to employees to ensure positive workflows
- Maintained professionalism in all interactions and used respectful communication to assist guests with their questions, problems, and concerns; relayed information to the Manager and Hotel management
- Recorded and entered data collected for required citations/ violations including time, date, and location of an infraction, vehicle information (license plate number, make, model, and color)

Technical Skills

JavaScript, TypeScript, AWS, React, AngularJS, Node.js, HTML, CSS, Passport, AGILE/SCRUM, GraphQL, REST, MYSQL, Mongoose, MongoDB, SQLite, PostgreSQL

Projects

WavePool https://github.com/Wave-Pool/wavepool

- Styled React components with Chakra UI.
- Implemented Socket.io w/Socket.io-client for real-time notification with toast(s).
- Engineered notification system with graphQL and React to create up-to-the-moment notifications and notification menu.
- Constructed authentication and refresh strategy with Passport-Spotify.
- Complimentary routes configured through Spotify API calls for seamless flow of data from the back-end to the front-end with Express and Axios.

Hash51 https://github.com/SpaceExecs/Hash51

- Initialized Express server with NASA API to enable search capabilities for custom React directive.
- Created back-end routes with Mongoose ORM for ideal data flow to and from MongoDB and React components.

Mixtape Club https://github.com/SpaceExecs/mixtape-club

- Established back-end routes combined with front-end Axios calls to manipulate data held by Youtube's servers.
- Created custom React component to be rendered by the client as needed.
